

AI-native brokerage

Rental fleet *insurance.*

Building the risk infrastructure
for Physical AI.

Small fleets are *under-observed*

Operating records already exist.
The broker has to assemble them
into a risk an insurer can evaluate.

Records arrive in fragments

Vehicle schedules, loss files and emails

Rental use needs a clear answer

Who drives, where, and under which terms

Carrier access takes work

A product listing does not confirm a route

One real fleet.

A traceable Risk Passport.

24

vehicles

32

maintenance records

11

mileage reviews

Source-linked fields

Mileage review

Incident gaps

Report + JSON

Source versions retained. Incident history remains unverified. No calibrated premium.

Early commercial *progress*

50+

fleet-owner opportunities

In the pipeline

20+

fleet owners in active intake

Part of the 50+ pipeline

broker partners

Arcadia Insurance Group
Barefoot One

Carrier review: a 33-vehicle rental fleet (September 28)

Founder-reported September 2026. Intake and pipeline do not represent bound policies or revenue.

Physical AI

Partner conversations

OrionStar Robotics

Initial conversation invited

Risk Passport for U.S. delivery
and cleaning robot deployments

Robot Health

Founder discussion

Potential cooperation discussed
at AIHealth Venture Day

Proposed pilot: one deployment sample and an underwriter-reviewed Risk Passport

September 2026. Exploratory discussions only. No signed robotics partnership or bound coverage.

Commission revenue.

Software leverage.

A policy funds the service.
Automation can lower the work per account.

Bound accounts

Average premium

Commission rate

Retained share

Multiplied together: annual commission retained by Indem

Track retained commission and service cost per account. Premium is not revenue.

The next submission *should know more.*

The record we can build

Operating evidence with provenance

Underwriter questions and decisions

Policy terms, renewals and loss outcomes

Small fleets.

Big possibilities.

- 01 Confirmed licensed submission routes
- 02 Bound policies and collected commission
- 03 Measured broker work per account

Rental fleets first. Risk infrastructure for Physical AI over time.
