

AI-native brokerage

Rental fleet *insurance.*

Building the risk infrastructure
for Physical AI.

Small fleets are *under-observed*

Operating records already exist.
The broker has to assemble them
into a risk an insurer can evaluate.

Records arrive in fragments

Vehicle schedules, loss files and emails

Rental use needs a clear answer

Who drives, where, and under which terms

Carrier access takes work

A product listing does not confirm a route

Insurance service, *delivered with AI*

AI preparation

Structured LLM extraction
Spreadsheet parsing
Source links and exception
checks

Licensed broker review

Clarify the rental operation
Review evidence and coverage
Control market release

Customer service

Coordinate carrier questions
Explain the quotes received
Support changes and
renewals

Brokerage commission on placed policies. No separate software subscription.

Quote preparation

AI prepares evidence

LLM extraction + rules.
Facts retain their
sources.
A broker resolves gaps.

Example on screen

Unit 022: confirm value
Unit 028: missing location

Actual UI / illustrative account / September 2026

Fleet Memory

Capture once

Vehicle-linked notes
and maintenance history
keep the account
current.

Reusable evidence

Review changes before
the next submission
or renewal.

LIVING FLEET RECORD

Capture the day once. Keep insurance ready.

Add a photo or a short note. AI organizes it; a person decides what becomes insurance evidence.

[Fleet view](#) [Broker view](#)

Vehicle: Unit 012 - 2021 Ford Edge

What happened? Unit 012, 48,210 miles. Rear tires need a tread-depth check in 45 days.

[Take or add photos](#) [Organize with AI](#)

Coming up

- Passenger-door damage documented
Aug 7, 2026 · Unit 009 · 2021 Kia Forte
- Vehicle schedule change prepared
Aug 8, 2026 · Fleet-wide
- Rear bumper and parking sensor repair
Aug 11, 2026 · Unit 017 · 2020 Toyota RAV4
- Rear tires moved to watch list
Sep 17, 2026 · Unit 012 · 2021 Ford Edge

Unit 012: 48,210 miles. Tire check in 45 days.

Actual UI / unsaved illustrative note / September 2026

Claims and repair support

Keep the evidence
with the case

Vehicle photos,
estimates
and open tasks stay
in one case record.

People decide

The carrier or authorized
adjuster determines
coverage and settlement.

Open task: driver statement + incident-number check

Actual UI / illustrative incident / September 2026

One real fleet.

A traceable Risk Passport.

24

mileage reviews

Source-linked fields

Mileage review

Incident gaps

Report + JSON

Source versions retained. Incident history remains unverified. No calibrated premium.

Early commercial *progress*

50+

fleet-owner opportunities

In the pipeline

20+

fleet owners in active intake

Part of the 50+ pipeline

2

broker partners

Arcadia Insurance Group
Barefoot One

Carrier review: a 33-vehicle rental fleet (September 28)

Founder-reported September 2026. Intake and pipeline do not represent bound policies or revenue.

Physical AI

Partner conversations

OrionStar Robotics

Initial conversation invited

Risk Passport for U.S. delivery
and cleaning robot deployments

Robot Health

Founder discussion

Potential cooperation discussed
at AIHealth Venture Day

Proposed pilot: one deployment sample and an underwriter-reviewed Risk Passport

September 2026. Exploratory discussions only. No signed robotics partnership or bound coverage.

Commission revenue.

Software leverage.

A policy funds the service.
Automation can lower the work per account.

Bound accounts

Average premium

Commission rate

Retained share

Multiplied together: annual commission retained by Indem

Track retained commission and service cost per account. Premium is not revenue.

Defensibility through *underwriting memory*

Working today

Source-linked operating records

Missing-item and conflict review

A reusable submission package

Defensibility to build

Human corrections and carrier replies

Policy terms, renewals and outcomes

Feedback tied to original evidence

The asset to build: permissioned evidence linked to corrections and carrier decisions.

Example: the rental-use question on a 33-vehicle submission. Carrier confirmation remains pending.

Insurance meets *AI engineering.*

Small fleets.

Big possibilities.

- 01 Confirmed licensed submission routes
- 02 Bound policies and collected commission
- 03 Measured broker work per account

Rental fleets first. Risk infrastructure for Physical AI over time.
