Indem

AI-native insurance brokerage

for the AI economy

Starting with independent rental fleets.

Expanding toward Physical AI and data centers.

Rental Fleets

Yudong Rao / Co-founder & CEO

Pre-seed / San Francisco / October 2026

Physical AI

Indem

Founder-market fit

Built from our own fleet

Yudong Rao

Co-founder & CEO

LinkedIn

Missouri P&C broker
WashU economics PhD researcher
Applied LLMs at the IMF

Fan Yang

Co-founder & CTO

LinkedIn

7 years of AI at Google
Built FleetNexus
Operates ~30 rental vehicles

Philip Dybvig

Advisor to Indem

2022 Nobel Laureate Economic Sciences
Yudong's PhD supervisor

Fan runs the fleet and builds the AI. Yudong leads insurance and distribution.

Indem

Small fleets are *under-observed risks*

33

vehicles. Every VIN supplied.

Rental use and loss history still determine market fit.

The vehicle is not the whole risk.

Who drives it and for what use?
What does the loss history show?
Which gaps need clarification?
Which insurer will consider it?

Anonymized 33-vehicle account. A market declined on history requirements; E&S options remain under review.

Indem

Insurance service.

Delivered with AI.

AI prepares

Read files and link sources
Flag gaps and conflicts
Assemble a review package

Brokers serve

Confirm risk and coverage
Control market release
Support changes and renewals

Carriers decide

Underwrite the account
Set price and policy terms
Issue accepted coverage

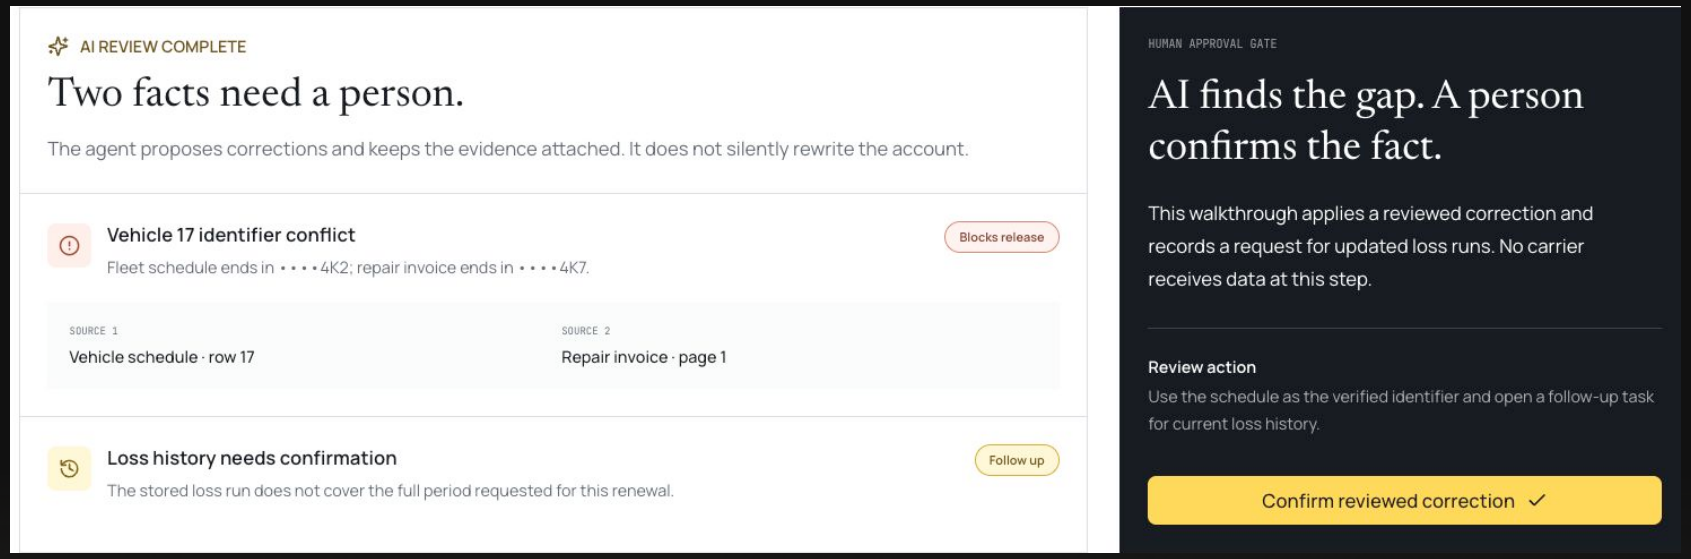

One prepared file. Human accountability. No separate software subscription.

Indem

From raw files to a reviewed submission

Missing details, made visible.

Source-linked facts
Open exceptions
Licensed review

Vehicle 17: conflicting ID
Loss history: incomplete

Actual product UI / illustrative account

Indem

Real demand.

Early commercial progress.

50+

fleet-owner opportunities

Pipeline

20+

owners in intake / quoting

Subset of the pipeline

2

broker partners

Arcadia Insurance Group
Barefoot One

Pre-revenue. Next milestone: bound policies and retained commission.

Founder-confirmed October 2026. Opportunities and intake are not paying customers or bound policies.

Indem

Our CTO's fleet, inside Indem

Real operating records. A working evidence import.

FleetNexus

Built by Fan for
his rental operation.

Source system / Sep 30

25

vehicles in FleetNexus

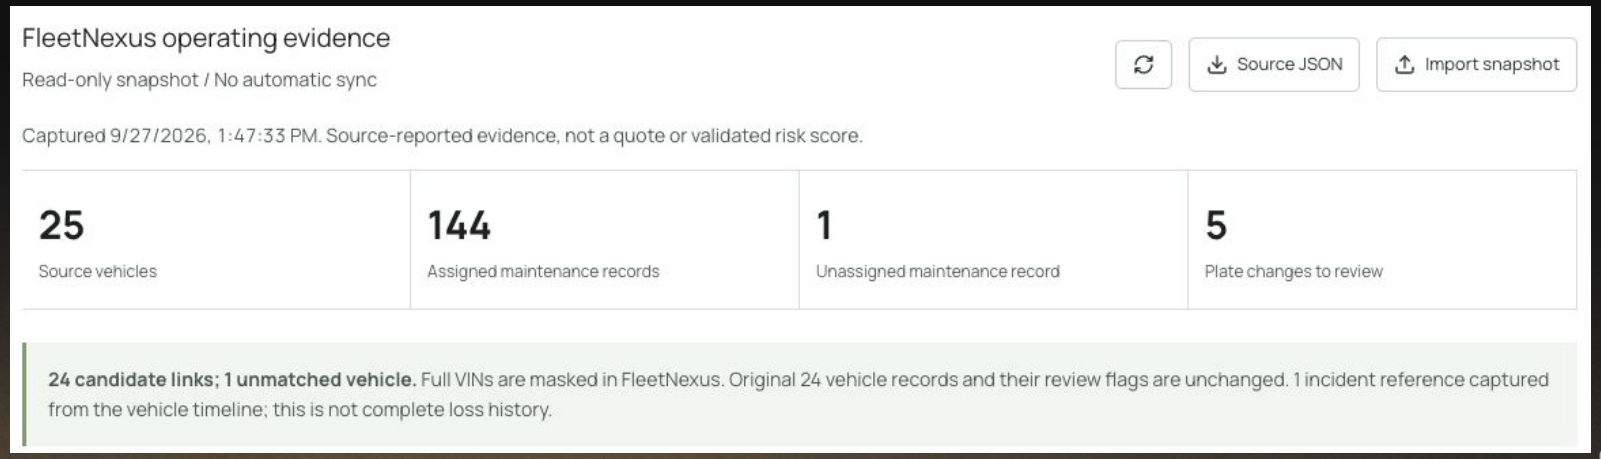

170

maintenance / service records

Indem Risk Lab

145 records imported
5 plate changes to review

Saved snapshot / Sep 27

Read-only snapshot. Next: link operating evidence to underwriting decisions and renewals.

Indem

The moat is *underwriting memory*

Working today

Founder-fleet operating history
FleetNexus snapshot imported
Source-linked evidence review

Compounding next

Reviewer corrections
Carrier questions and policy terms
Renewals and loss outcomes

The advantage to build: permissioned evidence tied to real insurance outcomes.

A data and workflow advantage to validate, not a claim of proven autonomous-risk pricing.

Indem

Commission revenue.

Software leverage.

Premium placed	x	Retained commission rate	=	Indem revenue

On placement and renewal

Measure: retained commission, bind conversion and broker work per account.

Retained rate is after intermediary splits. Service and acquisition costs still come out of revenue.

Indem

Independent rental fleets

A focused first customer

Customer wedge

Small rental operators
Turo-to-direct transitions
New and growing fleets

Current approach

Founder-led conversations
Website intake and follow-up
Broker relationships

Next commercial test

One repeatable market route
Referral and renewal demand
Acquisition cost per bound account

Track each stage: qualified owner, complete file, quote, bind and collected commission.

Indem

Insurance + robotics

Relationship progress

Koop

Underwriting meeting held

AV + robotics applications received for submission prep

Zurich

Rental-fleet programs

Program-fit and product discussions underway

OrionStar

U.S. commercial robotics

Early Risk Passport design-partner discussions

Aaron / Arcadia: existing broker partner for rental submissions and market access.

Stages differ. No committed capacity, binding authority or insured robotics deployment claimed.

Indem

Rental fleets first

Physical AI and beyond

A fleet client's autonomy question prompted our next market discovery.

Current	Rental fleets	Vehicle identity, rental use and documented losses
Discovery	Robotics	Tasks, supervision and incident evidence
Discovery	Autonomous fleets	Operating boundaries, software and interventions
Planned	Data centers	Power, cooling and interruption dependencies

Validate one new class at a time with an underwriting partner. No data-center customers claimed.

Indem

Raising pre-seed

Turn demand into policies.

01 Confirm repeatable, licensed submission routes

02 Convert rental-fleet demand into policies and commission

03 Measure broker effort and retained revenue per account

San Francisco headquarters. Founder-funded. Pre-revenue.

Seeking a hands-on partner for B2B go-to-market and AI service economics.

Yudong Rao / / indeminsure.com

Indem

Our first fleet-file analysis

A traceable Risk Passport.

24	32	11
vehicles	maintenance records	mileage reviews

Original records retained	Conflicts stay visible	Report + structured JSON

September 27 spreadsheet sample. Original observations retained separately from newer FleetNexus data.

Indem

Insurance service, built on *AI and human review*

Step	System	Control
Input	Tables, PDFs and images	Preserve originals and sources
Prepare	Parsing + configured LLM extraction	Return fields with source locations
Review	Missing-item and conflict checks	Broker confirms facts for release
Learn next	Permissioned reviewer corrections	Measure accuracy and review time

AI prepares evidence. Brokers deliver the service. Carriers set prices and issue coverage.

Indem

Evidence first.

Pricing only with validation.

Exposure

Miles or operating hours
Rental state or task scope
System and human control

Outcomes

Developed losses
Coverage, limits and terms
Matched risk populations

Validation

Underwriter review
Out-of-sample calibration
Uncertainty and monitoring

Current output: evidence report + structured data. A validated insurance premium remains a future milestone.

Indem

Appendix / A revenue model at scale

$20,000 annual premium x 10% retained rate

= $2,000 annual commission per account

Placed accounts	Annual premium	Retained commission
1,000	$20M	$2M
10,000	$200M	$20M
50,000	$1B	$100M

Illustrative sensitivity, not a forecast or TAM. All inputs are assumptions; operating costs are not deducted.

Indem

New assets.

Recurring insurance.

$975B

Robotaxis + autonomous trucks

Global annual industry revenue in 2035
Goldman Sachs forecast

$91B

AI data-center insurance

Global cumulative premiums, 2026-2030
Swiss Re forecast

Different metrics; do not add. These are market context, not Indem TAM or revenue.

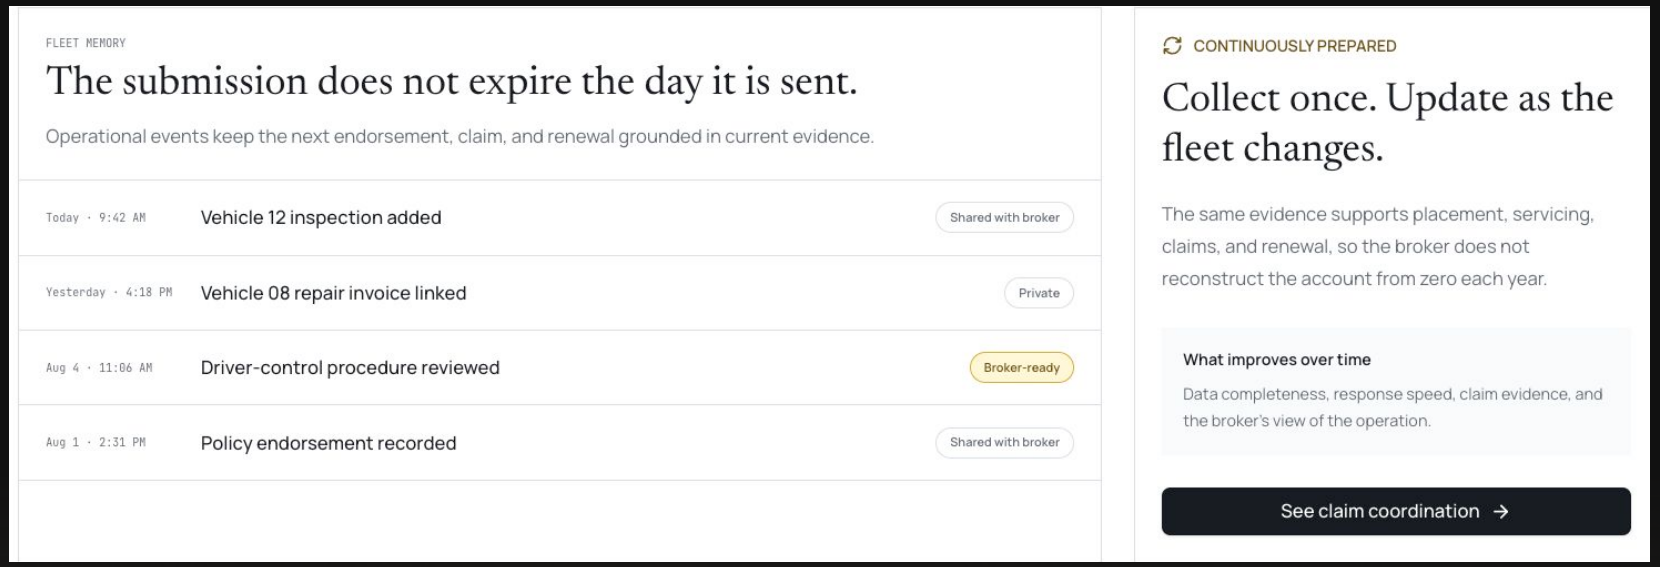

Indem

Appendix / Fleet Memory

Another renewal.

Not another restart.

Vehicle-linked notes and maintenance history keep the file reusable.

Inspections and repair records stay linked to the vehicle.

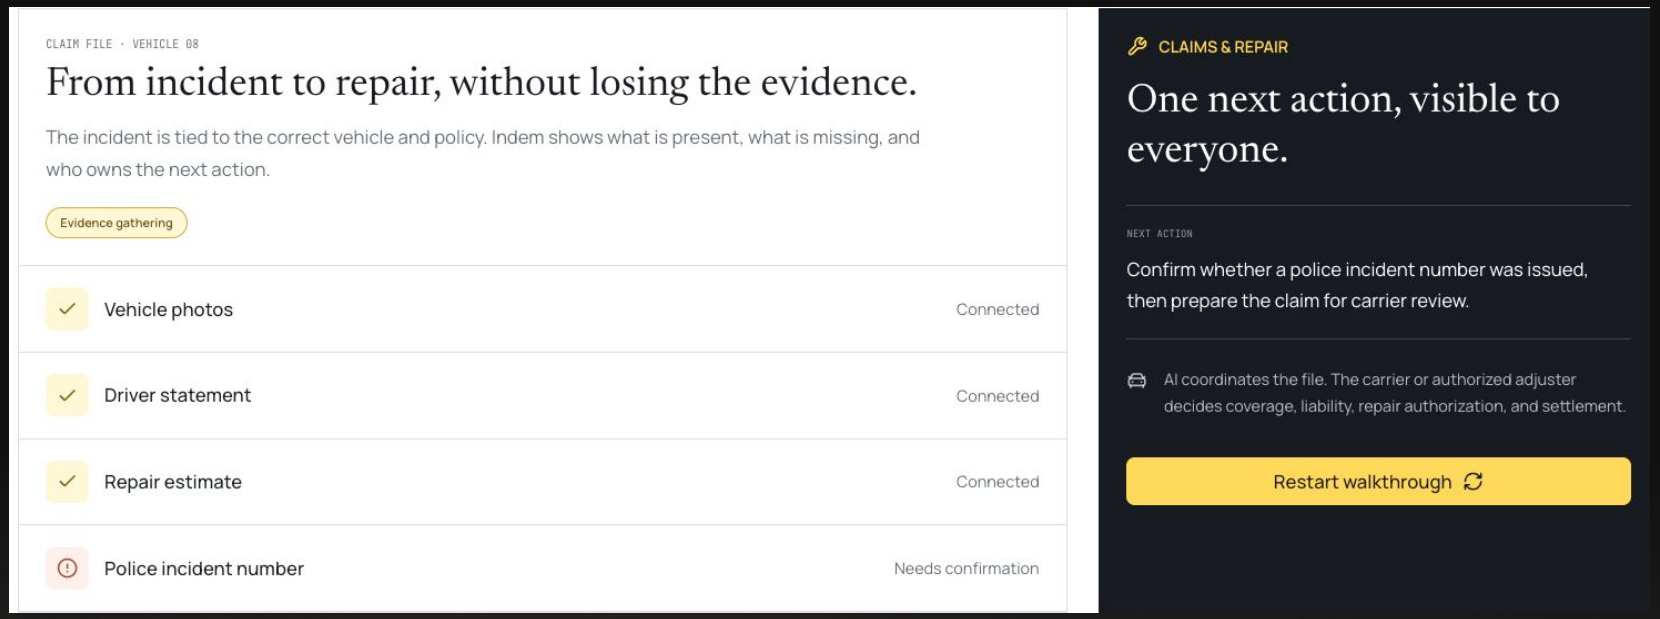

Actual product UI / illustrative event history / September 2026

Indem

Appendix / Claims and repair support

Evidence together.

Photos and estimates
Open tasks
One vehicle-linked case

The carrier or authorized adjuster decides coverage and settlement.
