Indem

AI-native insurance

for Physical AI.

Starting with independent rental fleets.

Insurance service today. A Risk Passport for autonomous fleets and robots.

Rental Fleets

Yudong Rao / Co-founder & CEO

indeminsure.com

Physical AI

Indem

Founder-market fit

Built from our own fleet

Yudong Rao

Co-founder & CEO

LinkedIn

Missouri P&C broker
WashU PhD researcher
Applied LLMs at the IMF

Fan Yang

Co-founder & CTO

LinkedIn

7 years of AI at Google
Built FleetNexus
Operates ~30 rental vehicles

Philip Dybvig

Advisor to Indem

2022 Nobel Laureate
Economic Sciences
Yudong's PhD supervisor

Fan runs the fleet and builds the AI. Yudong leads insurance and distribution.

Indem

The asset is only part *of the insurance risk*

What the asset list tells us

Vehicle or robot identity
Owner and declared value
Deployment location

What operations must explain

Tasks and operating boundaries
Human supervision and overrides
Software changes and incidents

Indem builds the evidence record behind the insurance submission.

Fleet-client discovery prompted our expansion. Robotics and autonomy need separate underwriting validation.

Indem

Insurance service, built on *AI and human review*

Step	System	Control
Input	Tables, PDFs and images	Preserve originals and sources
Prepare	Parsing + configured LLM extraction	Return fields with source locations
Review	Missing-item and conflict checks	Broker confirms facts for release
Learn next	Permissioned reviewer corrections	Measure accuracy and review time

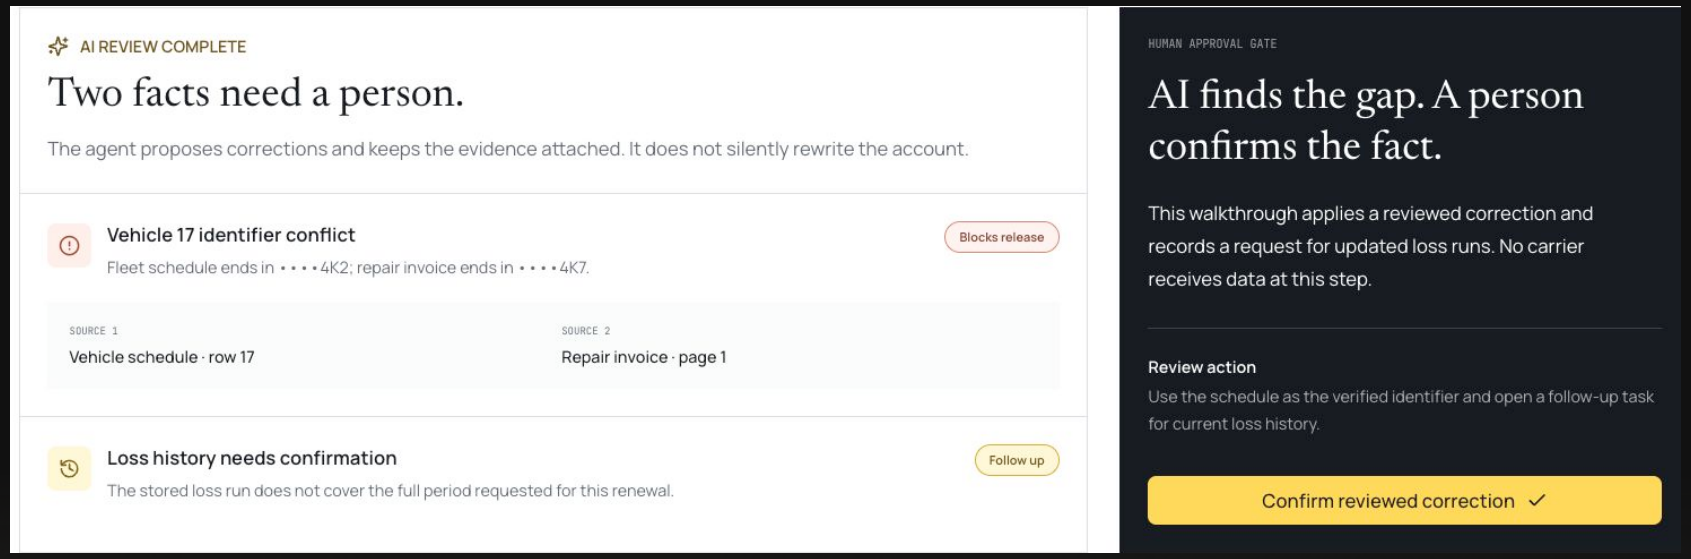

AI prepares evidence. Brokers deliver the service. Carriers set prices and issue coverage.

Indem

From raw files to a reviewed submission

Missing details, made visible.

Source-linked facts
Open exceptions
Licensed review

Vehicle 17: conflicting ID
Loss history: incomplete

Actual product UI / illustrative account

Indem

Our CTO's fleet, inside Indem

Real operating records. A working evidence import.

FleetNexus

Built by Fan for
his rental operation.

Source system / Sep 30

25

vehicles in FleetNexus

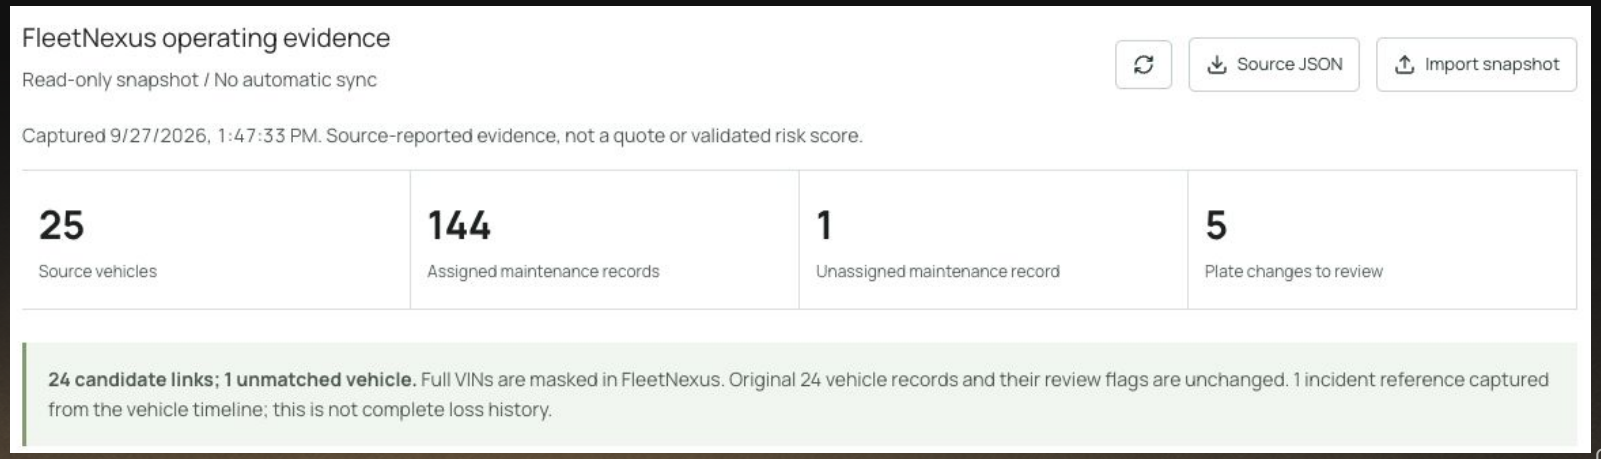

170

maintenance / service records

Indem Risk Lab

145 records imported
5 plate changes to review

Saved snapshot / Sep 27

Read-only snapshot, not live sync. Fleet health indicators are not insurance pricing.

Indem

Real demand.

Early commercial progress.

50+

fleet-owner opportunities

Pipeline

20+

fleet owners in active intake

Subset of the pipeline

2

broker partners

Arcadia Insurance Group
Barefoot One

50+ vehicles in the quoting workflow / Week of September 28

Founder-reported September 2026. Intake and pipeline are not bound policies or commission revenue.

Indem

Insurance + robotics

Partnership discussions

Koop

Robotics underwriting

Zurich

Rental-fleet programs

OrionStar

Commercial robotics

Next: a rental-fleet submission route and an underwriter-reviewed robotics pilot.

Exploratory discussions. No signed capacity or robotics deployment agreement represented.

Indem

The moat is *underwriting memory*

Working today

Founder-fleet operating history
FleetNexus snapshot imported
Source-linked evidence review

Compounding next

Reviewer corrections
Carrier questions and policy terms
Renewals and loss outcomes

Revenue: brokerage commission on placement and renewal.

A data and workflow advantage to validate, not a claim of proven autonomous-risk pricing.

Indem

Raising pre-seed

Turn demand into policies.

01 Confirm repeatable, licensed submission routes

02 Convert fleet demand into policies and commission

03 Validate one robotics pilot with an underwriter

Insurance for the AI economy. Built from real operations.

Indem

Our first fleet-file analysis

A traceable Risk Passport.

24
vehicles

32
maintenance records

11
mileage reviews

Original records retained

Conflicts stay visible

Report + structured JSON

September 27 spreadsheet sample. Original observations retained separately from newer FleetNexus data.

Indem

Small fleets are *under-observed risks*

33

vehicles. Every VIN supplied.

But rental-use liability
still needs confirmation.

The vehicle is not the whole risk.

Who drives it?
Where and for how long?
What changes between rentals?
Which insurer will accept it?

Real submission, anonymized. Coverage review remains open.

Indem

Commission revenue.

Software leverage.

Premium placed **x** Retained commission rate **=** Indem revenue

On placement and renewal

Measure: retained commission, bind conversion and broker work per account.

Retained rate is after intermediary splits. Service and acquisition costs still come out of revenue.

Indem

Evidence first.

Pricing only with validation.

Exposure

Miles or operating hours
Rental state or task scope
System and human control

Outcomes

Developed losses
Coverage, limits and terms
Matched risk populations

Validation

Underwriter review
Out-of-sample calibration
Uncertainty and monitoring

Current output: evidence report + structured data. A validated insurance premium remains a future milestone.

Indem

Our clients led us to *Physical AI*

A rental-fleet client brought autonomous vehicles into the insurance conversation.

Now	Rental fleets	Vehicle identity, rental use, maintenance and losses
Validate	Commercial robotics	Deployment scope, supervision and incident evidence
Expand	Autonomous fleets	Operating boundaries, software and interventions
Adjacent	AI data centers	Assets, power, cooling and interruption exposure

Each new class advances only with a qualified deployment and a licensed underwriting route.

Indem

New assets.

Recurring insurance.

$975B

Robotaxis + autonomous trucks

Global annual industry revenue in 2035
Goldman Sachs forecast

$91B

AI data-center insurance

Global cumulative premiums, 2026-2030
Swiss Re forecast

Different metrics; do not add. These are market context, not Indem TAM or revenue.

Indem

Appendix / A revenue model at scale

$20,000 annual premium x 10% retained rate

= $2,000 annual commission per account

Placed accounts	Annual premium	Retained commission
1,000	$20M	$2M
10,000	$200M	$20M
50,000	$1B	$100M

Illustrative sensitivity, not a forecast or TAM. All inputs are assumptions; operating costs are not deducted.

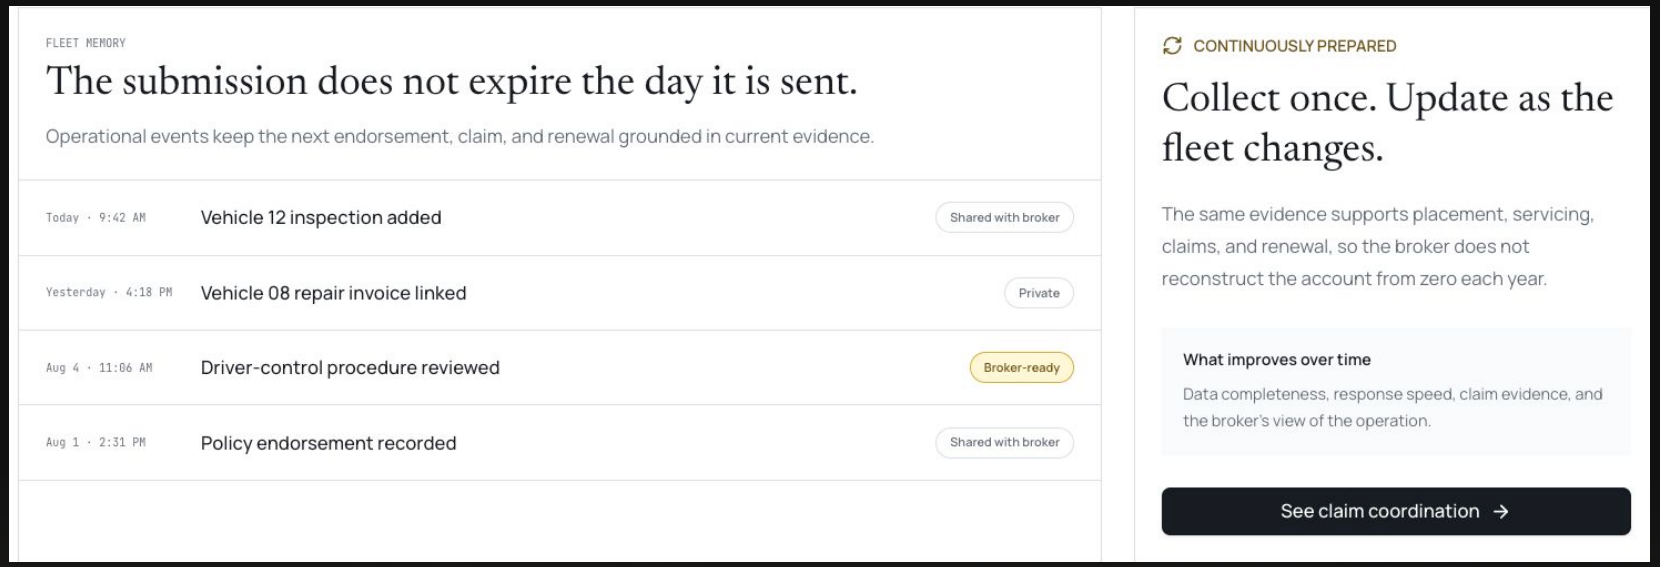

Indem

Appendix / Fleet Memory

Another renewal.

Not another restart.

Vehicle-linked notes and maintenance history keep the file reusable.

Inspections and repair records stay linked to the vehicle.

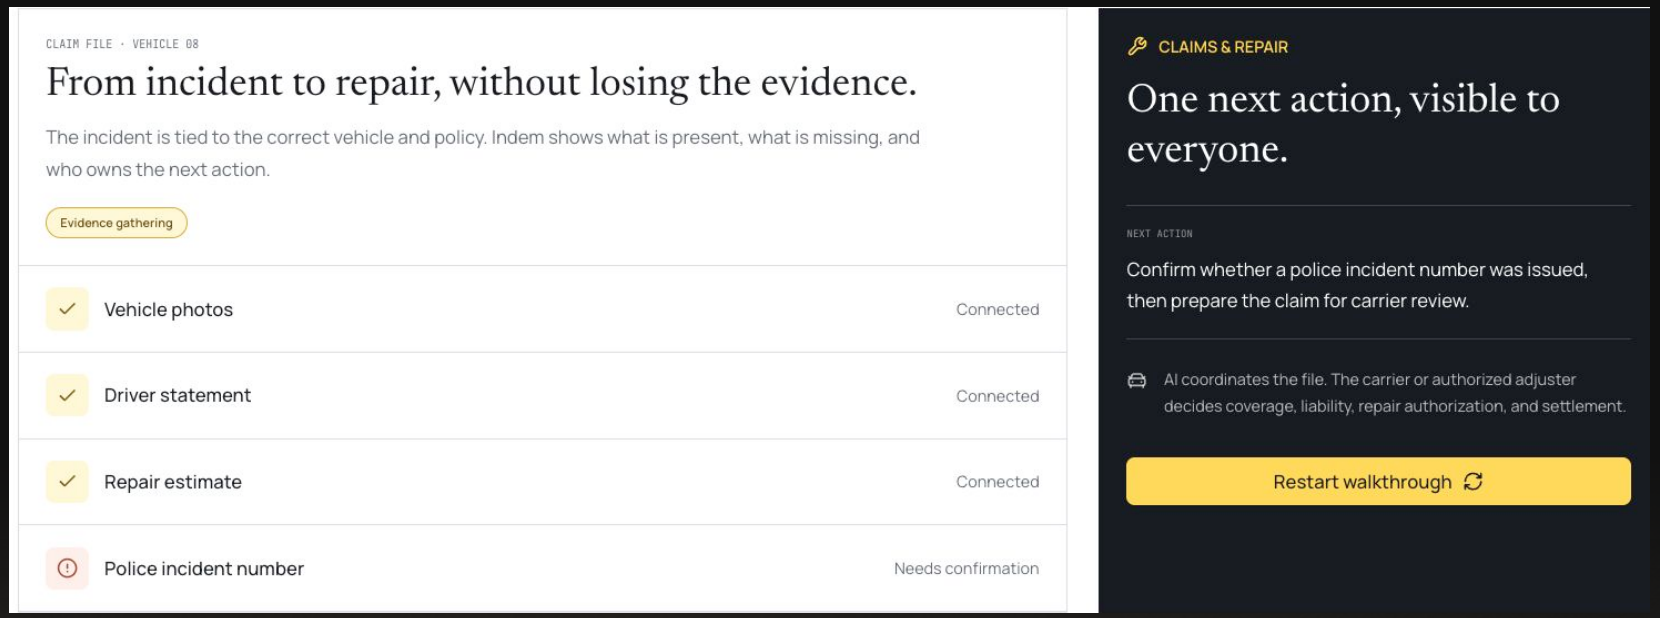

Actual product UI / illustrative event history / September 2026

Indem

Appendix / Claims and repair support

Evidence together.

Photos and estimates
Open tasks
One vehicle-linked case

The carrier or authorized adjuster decides coverage and settlement.
